## DETAILED ACTION

### *Response to Arguments*

The applicant's Remarks/Arguments indicate the claims have been amended "to limit the resonant RF structure to be conductively decoupled from any structure outside of the resonant RF structures" where, in view of the following discussion comparing the inventive concept with the prior art, appears to mean the resonant RF structure is reactively coupled only to the RF coupling structure (a second independent claim element). Also, it is expected the ends of the resonant structure couples with the nearby ground plane, see figure 1. Consequently, the amended claim language to limit the structure coupling is not clear and is addressed in the following rejection.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, 4-6 and 8-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim language of independent claims 1, 14, 15 and 18 have been amended to include "wherein the resonant RF structure is not conductively coupled to any other structure outside of the resonant RF structure" which is in contradiction to the resonant RF structure "reactively coupled to the RF coupling end" of an RF coupling structure.

Art Unit: 2618

Consequently, the claim language is unclear as to what the resonant RF structure is and is not conductively coupled.
